Day Neuro Program

Your First Day

A family member or caregiver will need to accompany you on the first day and stay with you through the orientation process. Parking is available at all locations for free. You will receive more specific parking information prior to your first day. Before beginning your program, you must register at the front desk. After registering you will be escorted to the Day Neuro conference room. We will review your orientation packet with you and answer any questions that you may have. Each interdisciplinary team member will schedule time to evaluate your needs and to discuss treatment planning with you.
Why Baylor Institute for Rehabilitation?

Baylor Institute for Rehabilitation has provided therapy services to patients with acquired brain injury for over 30 years and has been recognized by U.S. News and World Report as one of the top rehabilitation facilities in the country. We offer a full continuum of inpatient and outpatient services for persons with brain injury, which allows patients to access any of these services, as needed, within the same treatment provider to help deliver continuity of care. The continuum includes:

- Coma Management Program
- Acute Inpatient Program
- Outpatient Specialty Clinics
- Adaptive Driving Program
- Individual outpatient therapies
- Neuropsychological evaluations, full and half-day
- Real Life Rehab, a community-based treatment program
- Day Neuro Rehabilitation Program

About the Program

Each new patient is evaluated by the interdisciplinary treatment team. Based upon their findings, an individualized treatment plan will be developed and may incorporate a variety of specialized therapies. Each specialist brings to the team an expertise in a specific area of neurological rehabilitation. Each patient will participate in a 5-6 hour individualized therapy program Monday through Friday and may include some of the following team members:

- Physiatrist*
- Speech-Language Pathologist
- Neuropsychologist
- Occupational Therapist
- Physical Therapist
- Therapeutic Recreation Specialist
- Social Worker*
- Rehabilitation Nurse*
- Rehabilitation Aide
- Driver Rehabilitation Specialist

*only available in some locations

Your Daily Schedule

Daily treatment schedules are customized to meet the individualized needs of each patient. Your day will be comprised of individual treatment time with a therapist and multi-patient activity sessions. Skills addressed in these sessions, include, but are not limited to:

- Expressive language skills
- Cognitive skills/problem solving
- Orientation skills
- Adjustment skills
- Home and money management
- Physical performance/exercise
- Aquatics
- Speech intelligibility
- Brain information
- Social skills
- Meal preparation and planning
- Work skills
- Leisure activity groups/discussion
- Community re-entry skills/outings
- Driving & Community Mobility

The length of stay in the program varies from patient to patient and can be anywhere from a 2-week to a 16-week stay. The average length of participation for our patients is 8 weeks. The treatment team will work closely with you and your family to determine the most appropriate length of treatment to meet your individual needs and goals.
